KANAN JAIN

Frontend Developer | Applied AI and Machine Learning
Delhi, India | +91-8860828246 | kananjn45@gmail.com
LinkedIn: linkedin.com/in/kanan-jain-762785298 | GitHub: github.com/kananjn45 | Portfolio: kananjn45.github.io/Profile

PROFILE SUMMARY

BCA student and frontend developer building responsive web applications in HTML5, CSS3, JavaScript, and Bootstrap, alongside end-to-end Machine Learning and Deep Learning pipelines in Python. Delivered a legal-contract intelligence capstone on the CUAD dataset (510 contracts, 41 clause categories) combining TF-IDF classification, a Keras ANN benchmark, and a rule-based risk engine. Seeking a Frontend Developer or AI / Data Science internship.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML5, CSS3, SQL, DAX

Frontend: Responsive Design, CSS Grid/Flexbox, Bootstrap 5, DOM Manipulation, Semantic HTML, WCAG Accessibility

ML / DL: Scikit-learn, Keras, TensorFlow, Random Forest, SVM, KNN, Logistic Regression, TF-IDF, ANN (MLP), Feature Engineering

Data and Tools: Pandas, NumPy, Seaborn, Matplotlib, Power BI, Git, GitHub, Streamlit, Netlify, Vercel

EXPERIENCE

Summer Trainee, AI Using Python June 2026 – August 2026

ShapeMySkills by DUCAT, Delhi, India

- Engineered the capstone LegalMind AI on the CUAD dataset (510 contracts, 41 clause categories), combining a TF-IDF and Logistic Regression classifier with a rule-based JSON risk engine.
- Built deep learning benchmarks using a Keras MLP and shipped an interactive Streamlit application; authored an IEEE SRS-style specification and a 4-page Power BI executive dashboard.

PROJECTS

LegalMind AI — Automated Legal Contract Intelligence and Clause Risk Analysis

Python, Scikit-learn, Keras, Streamlit, Power BI | github.com/kananjn45/LegalMindAI

- Built a clause classifier for 41 contractual categories using a high-dimensional TF-IDF vectorizer with a tuned Logistic Regression classifier, plus a rule-based JSON risk engine flagging uncapped damages and one-sided termination clauses.
- Benchmarked a Keras ANN against classical models and delivered a multi-page Power BI dashboard with DAX measures for clause distribution and risk heatmaps.

Climate Change ML and Data Analysis — Regression and Classification

Python, Pandas, Scikit-learn, Seaborn, Matplotlib | github.com/kananjn45/Climate-Change-ML-DA

- Built dual ML pipelines on 25 years of Indian climate data (10 states, 3,120 records); best models reached R^2 approx. 0.933 (regression) and 78.2% accuracy (drought classification).

EDUCATION

Bachelor of Computer Applications (BCA) 2025 – 2028

Institute of Information Technology and Management (IITM), Delhi
Affiliated with Guru Gobind Singh Indraprastha University

Relevant coursework: Python, JavaScript, SQL, Data Structures and Algorithms, Software Engineering.

CERTIFICATIONS AND ACTIVITIES

- Data Science Essentials with Python — Cisco Networking Academy, December 2025
- Cyber Job Simulation — Deloitte via Forage, October 2025
- Class Representative, IITM Delhi; active hackathon participant.
