Kanan Jain

Delhi, India | +91-8860828246 | kananjn45@gmail.com | linkedin.com/in/kanan-jain-762785298 | github.com/kananjn45 | kanan-at-work.web.app

Education

Institute of Information Technology and Management (IITM) — Delhi, India
Bachelor of Computer Applications (BCA); Affiliated with GGSIP University — *Aug 2025 – May 2028*

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (SQL), Software Engineering, Web Technologies.

Technical Skills

Languages: Python, JavaScript (ES6+), Dart, SQL, HTML5, CSS3, DAX

AI, ML & Multi-Agent: LangGraph, Google ADK, Scikit-learn, TensorFlow, Keras, MediaPipe, OpenCV, DeepFace, Prompt Defense, Deterministic Guardrails, TF-IDF

Web & Mobile Development: React.js, Flutter, Node.js, Express.js, Firebase (Auth & Firestore), REST APIs, WebSockets (Socket.IO), Tailwind CSS, Vite

Developer Tools & Cloud: Git, GitHub, VS Code, Google Cloud Run, Vercel, Netlify, Power BI, Streamlit, Pandas, NumPy

Experience

ShapeMySkills by DUCAT — Delhi, India
Summer Trainee – AI Using Python — *June 2026 – Aug 2026*

- Engineered the **LegalMind AI** contract intelligence system on the CUAD dataset (510 legal contracts, 41 clause categories), combining high-dimensional TF-IDF vectorization with tuned Logistic Regression classifiers.
- Benchmarked a Keras ANN against classical ML models; authored an IEEE SRS-style specification and built an interactive Streamlit application alongside a 4-page Power BI executive dashboard with custom DAX risk heatmaps.
- Built a rule-based JSON risk engine that automatically flags uncapped indemnities and asymmetric termination clauses.

Projects

ORCA-Intel – AI Marine Co-Pilot | ***LangGraph, GeoPandas, Flutter, SQLite, Bhashini AI, Python*** *SIH 2026 / ISRO*

- Led 6-member team (*BitVerse 404*) nominated for SIH 2026 on ISRO's disaster management challenge to eliminate international maritime boundary line (IMBL) arrests and enhance artisanal fishing yields across 7,516 km of coastline.
- Architected a LangGraph multi-agent DAG (Planning, PFZ, Weather, Boundary) guarded by deterministic Python symbolic rules that bypass LLM to enforce zero-hallucination overrides when wind > 25 knots, waves > 2.5m, or border distance < 2 km.
- Formulated a 15-minute dynamic forward lookahead drift vector ($P_{lookahead} = P + (V_v + V_d) \times 15min$) and Marine A* routing, cutting vessel diesel consumption by 20–30% while avoiding hazards.
- Shipped a hybrid edge Flutter app with a 5.8 MB offline SQLite pack for 100% disconnected high-seas operation.

Awaaz Mobile – Real-Time On-Device Sign Language Translator | ***Flutter, MediaPipe, TFLite, Python*** *Dextrix Hacka*

- Built an offline mobile translator converting Indian Sign Language (ISL) hand gestures into vernacular text and synthesized speech; awarded **Top 6 Finalist** at Dextrix Hackathon (36-hour sprint).
- Extracted 21-point 3D hand landmarks via MediaPipe; trained and quantized an MLP classifier to TFLite for zero-latency local inference on mobile devices without internet connectivity.

SETU – Autonomous Merchant Operations Teammate | ***LangGraph, Sarvam AI, FastAPI, MQTT, Python*** *Paytm H*

- Engineered an autonomous dispute resolution teammate for merchant infrastructure, delivering zero-touch dispute adjudication in < 45s by concurrently querying NPCI switch logs, CBS ledgers, and Soundbox MQTT telemetry.
- Orchestrated a deterministic LangGraph state machine classifying disputes into 6 canonical states; implemented **SoundboxChimeGuard** preventing fraudulent replay without verified CBS ledger credits.
- Integrated Sarvam AI (Saarika ASR, Bulbul TTS) for real-time counter-side voice verification in Hindi/Tamil/Telugu in < 3s and tracked regulatory RBI TAT (T+1) auto-reversal compliance with delay compensation calculations.

Raksha (RakshaNet AI) – Zero-Internet Emergency Mesh Network | ***Android, BLE 5.0, Wi-Fi Direct, AES-256*** *Ne*

- Engineered a peer-to-peer offline emergency app for cellular dead-zones and disaster areas, awarded **Top 15 Finalist** at Nexhack (Sept 2026).
- Implemented 1-tap SOS distress beacons with GPS coordinates relayed across nearby smartphones via BLE 5.0 and Wi-Fi Direct using AES-256 encrypted store-and-forward routing without mobile networks.

Honors, Leadership & Certifications

- **Smart India Hackathon (SIH 2026):** Team Leader of *BitVerse 404*, officially nominated by college for ISRO PS #26176.
- **Hackathon Distinctions:** Top 6 Finalist at Dextrix Hackathon 2026 (*Awaaz Mobile*); Top 15 Finalist at Nexhack 2026 (*Raksha*); Finalist at Matrix Hackathon 2026 (*Cognify*) & Paytm Build for India Hackathon (*SETU*).
- **Leadership & Extracurriculars:** Class Representative at IITM Delhi; Active member and organizer at Lafz Debate & Literary Society.
- **Certifications:** Data Science Essentials with Python (Cisco Networking Academy, Dec 2025); Cyber Job Simulation (Deloitte via Forage, Oct 2025).
